

DELORME
inReach™
 2-way Satellite Communicator

Stay connected at the ends of the earth and everywhere in between.

inReach is the first affordable two-way satellite communicator with send-and-receive texting, Follow-me/Find-me tracking and location, and 100% global coverage.

The inReach advantage

- Ability to send and receive information in both SOS & personal text messages
- Delivery confirmation - you'll always know when your message is received
- 100% global Iridium satellite coverage - you're never out of range
- Follow-me/Find me tracking and locating, with unique Ping-me feature

2-way emergency communication lifeline

- Report the nature and location of your distress so proper resources can be deployed
- Exchange important situation and ETA updates with responders
- Easy cancellation feature, plus prevention against false alarms

2-way link with family and friends

- Provide status updates and get the latest news from home
- Communicate to/from cell phones and email contacts
- Post to Twitter and Facebook

Stay 'in sight' with Follow-me/Find-me tracking and locating

- Online MapShare page displays your location on topo maps & aerial imagery
- Ping-me feature lets family see your location even if you haven't activated tracking

For 2-way messaging, pair inReach with these devices:

iPhone®, iPad®, iPod touch® and Android phones and tablets*

Get free device Apps and GPS Maps

The free Earthmate app enables all inReach functionality on iOS and Android devices.

It also allows free downloads of DeLorme maps for GPS navigation.

inReach can also be used by itself.

inReach by itself is a versatile communicator for standalone use. A companion device is not required.

* iPod touch, iPhone and iPad are trademarks of Apple, Inc., registered in the U.S. and other countries.
